

ENTRUST

Instant ID as a Service Ribbons

Distributors and resellers can now sell Instant ID as a Service (IIDaaS) to customers without requiring any software account management. IIDaaS Ribbons for Sigma supplies mirrors the existing no-hassle supplies sales process today.

Overview

Instant ID as a Service (IIDaaS) is a cloud-based identity software that enables organizations to design, issue, and manage physical ID cards securely and efficiently.

Now, you can equip your customers with IIDaaS Ribbons by leveraging Entrust IIDaaS cloud badging software, seamlessly transitioning your customers to the cloud.

Why Combine Supplies With IIDaaS?

Integrating ribbon supplies with IIDaaS offers a straightforward issuance solution that's easy to sell and consume. By selling the same supplies your customers already use alongside IIDaaS, you can streamline software contract management and receive upfront payment at the point of sale. This frees up time for both you and your customers to focus on value-added activities without having to manage the software account, Entrust takes care of account management.

KEY FEATURES AND BENEFITS

- **Cloud-Based Convenience:** Access IIDaaS from anywhere with an internet connection, no servers required
- **Customizable Templates:** Design personalized ID cards with our easy-to-use robust card designer
- **Effortless Role-Based Access Control:** Manage user permissions and access levels with ease
- **Data Privacy and Security:** Entrust employs end-to-end encryption for all data in transit and at rest. Data is never stored in the printer after printing
- **Seamless Scalability:** Easily scale your ID card issuance capabilities to meet organization needs
- **No Service Maintenance Agreements:** Entrust support and automatic software updates are included with IIDaaS Ribbons
- **Compliance:** IIDaaS is designed to assist organizations in meeting regulatory and industry standards related to card issuance and data security

Instant ID as a Service Ribbons

The IIDaaS Ribbon Advantage

- Selling IIDaaS Ribbons mirrors existing supply processes, eliminating the need for additional account management
- With upfront payment, there's no waiting for revenue
- End-users benefit from a simple two-step self-service onboarding process, removing the hassle of software renewals

HIGHLIGHTS

Streamlined and user-friendly

- Hassle-free card issuance with cloud deployment, eliminating heavy downloads while Entrust manages software updates and support
- Drag-and-drop feature and browser-based interface for effortless card enrollment, design, and issuance
- Intuitive printer dashboard lets you monitor printer status, order supplies, check cleaning status, update firmware, or contact help - all conveniently accessible from your mobile device

What sets our ID cloud software apart from others?

- **Seamless Printer Integration:** Our intuitive printer dashboard and intelligent printing capabilities ensure seamless matching of printers, supplies, and card types
- **Robust Security:** Leveraging a trusted and mature cloud platform, our solution offers unparalleled security, with encrypted data transmissions between software and printer

Enhanced included features

- **Hassle-free Maintenance:** Entrust manages software updates and support, ensuring smooth operations
- **Customized Options:** Empower up to 100 admins and card operators with customizable card design, batch printing, magnetic stripe encoding, customizable workflow, and mobile enrollment and issuance capabilities

Instant ID as a Service Ribbons

How It Works for Distributors

Distributors can order IIDaaS Ribbons supplies from Entrust, facilitating the promotion of new items to their resellers. This product aligns seamlessly with existing supply sales, eliminating any additional burden. Distributors can simply sell and forget, without added complexity.

How It Works for Resellers

Resellers have the flexibility to prioritize IIDaaS for both new and existing customers, adjusting their involvement levels as needed. Resellers enjoy the same benefits without the need of maintaining software support or service teams, as Entrust manages service and support on their behalf.

How It Works for End Users

- **Step 1:** New users initiate a simple two-step account opening process by scanning a QR code included in each IIDaaS Ribbons box
- **Step 2:** Users install an IIDaaS Ribbon into their Sigma printer to activate their account
- **Step 3:** When the ribbon supply depletes, users simply replace it with another supply and resume printing, mirroring the process with existing supplies

TECHNICAL SPECIFICATIONS

Support Printer Model(s)	Sigma DS2, Sigma DS1
Required Connectivity	Internet Connected (Ethernet/WiFi)
Supported Ribbon Supplies	YMCKT-500 (roll)
Minimum Required Firmware Version	D4.3.1
